

WALL OPTIONS FOR ALPINE HUTS AND BARNs

When designing the Alpine cabin or Barn for your project, you can choose between different wall options. The flexible system allows any kind of wall to be connected.

” 01 FULL WALL

This is a completely closed wall. It can be used to separate rooms from each other.

” 02 OPEN WALL

If you want a semi-open or fully open construction, we can leave out all or some of the walls.

” 03 STANDARD WINDOW

A standard window for an Alpine cabin or Barn is a full wall with a small double opening window with decorative shutters.

” 04 PANORAMIC WINDOW VERTICAL

There is also a possibility to choose glass walls. These vertical panoramic windows are made of black lacquered aluminium and bring in an enormous amount of light.

” 05 PANORAMIC WINDOW HORIZONTAL

The horizontal windows are a wooden window element divided into 3 panes. By combining several window elements with each other, you create 1 large panoramic wall.

” 06 PANORAMIC FAÇADE

The panoramic facade is the triangular part of the front and/or back wall of the Alpine cabin or Barn.

” 07 PANORAMIC WALL

By combining panoramic windows and a panoramic façade, we can provide an Alpine hut with a fully glazed wall. This creates a very open feeling.

” 08 SCREEN

With our screens, you have the option of opening or completely closing the Alpine cabin. Ideal for changeable weather conditions!

” 09 DOUBLE DOOR

The double door provides access to the Alpine cabin or Barn. It is always equipped with a panic lock so that it can be completely closed. Two double doors can also be placed next to each other to make the entrance even wider.

” 10 GATE

Choose a large double gate as an entrance on the Barn façade to create an authentic look.

” 11 DECORATIVE FENCE

A decorative fence can be used to separate rooms from each other or as a fence for an Alpine cabin (both inside and outside).

” **12 HATCH**

A hatch is ideal as a wall option for take-away service, ticket booth, reception, ...

” **13 NORDIC WALL**

The Nordic wall is the same as our standard wall, but in a beautiful, warm Scandinavian red.

” **14 COUNTRY WALL**

The Country wall is the same as our standard wall, but in a beautiful, warm Scandinavian green.
