

Sharing Cities

- **Project duration:** 2016 – 2020 (2021)
- **Countries covered.** Lighthouse cities: UK (Greenwich, London), Portugal (Lisbon), Italy (Milan). Followers cities: Bulgaria (Burgas), France (Bordeaux), Poland (Warsaw)
- **Scope and problem addressed:** developing smart- and low energy urban districts, implementing affordable solutions and cooperative approaches/models for: energy building retrofitting, shared e-mobility, citizen-oriented data and digital services
- **Key achievements:** the cities have invested on public building energy efficiency; involved private owners in high energy-performing, co-designed, condominium renovation projects (Milan); strengthened their investments and attracted investors on urban sharing e-mobility; developed (Greenwich) or strengthened their e-vehicle charging network; developed their urban sharing platform. **Next steps:** monitoring and dissemination; checking behavioural change in house management by residents, with regard to building energy efficiency:
