

- **Project duration:** 1.3.2018.-28.2.2021.
- **Countries covered:** Croatia, Belgium, Latvia, Spain, Norway
- **Objectives:**
 - Empower local and regional authorities to find innovative and cost-effective approaches to develop, finance, implement and improve SECAP
 - Develop a peer-to-peer platform
 - Provide climate communication training and guidelines for the partners in the consortium and the associated pilot municipalities
- **Key achievements and next steps:** PentaHelix consortium is currently developing 25 SECAPs by following PentaHelix approach, 40 municipalities provided positive feedback to become replication municipality.
- **Benefits of PentaHelix approach:** stakeholders feel involved in the overall planning process, realistic measures added into the SECAP, a stronger focus on the financing and links to existing and future funding sources, grounds for communication between the different stakeholders, potential identification of synergies...
