

*Your expert in matting*

***CleanMid***<sup>®</sup>

*Perfect balance between function and style*

[www.verimpex.eu](http://www.verimpex.eu)

Fine detail or unusual shapes: a made-to-measure mat offers you a huge range of possibilities. CleanMid® excels with its unique colours and tailor-made precision. The outstanding technical quality of our fitted products makes them ideal for any interior. Together with you, the Verimpex experts will design a floor mat that perfectly matches any architectural feature.

# CLEANMID

## LIGHT & HEAVY

### *Versatile beauty*

Fast drying, long lasting and easy to maintain. Meet CleanMid®, the roll-up mat that combines great looks with great performance. Say goodbye to fine sand, dust and damp! Say hello to attractive and hardwearing durability! Thanks to its unique composition of high-tech textiles and high-grade aluminium, combined with a wide range of options, CleanMid® offers the ideal solution for every interior.

#### **Home, shop or office:**

CleanMid® is right at home in any space and is suitable for both light and intensive traffic. We can deliver mats in specific colours and can even personalize them with your company logo.

- ▶ Long lasting
- ▶ Good dirt absorption
- ▶ Wide range of colours
- ▶ Dries quickly
- ▶ Easy to maintain
- ▶ Lots of combination options
- ▶ Replaceable inserts

*CleanMid*®

## ***Wear-resistant textile technology***

CleanMid® combines seamless woven textile with a double coating in polypropylene. Short woven threads in high quality polyamide 6.6 give the CleanMid® an unequalled strength and durability. The threads create a flowered-effect surface that covers the aluminium profile. The result is hard-wearing textile at its best. The CleanMid® is also revolutionary in its approach to recycling, through its use of regenerated Econyl thread. This thread is made from at least 50% reused materials. For the aluminium profile, this number increases to 90%!

## ***Fire resistance***

Cleanmid® complies with fire norm **Bfl-s1**, the highest and most demanding norm for this type of product. We have developed a very safe mat in terms of flammability and smoke emission.

## ***Dries in minutes***

The open structure of the textile ensures the rapid dispersion and evaporation of damp. The capillary working of the high quality fibre structure (3700 denier) strengthens this drying effect. The interlocking and abrasion-resistant textile strips give fungal growth no chance to form.

## ***Colourful and colourfast***

From light grey to marine blue. From deep black to attractive anthracite.

CleanMid® is available in many different colours and finishes. In addition to our wide standard range, unique colours can be made on request. Whatever your choice, colourfastness is always guaranteed.

## Attractive outside, smart inside

The CleanMid®Light and CleanMid®Heavy combine ingenuity, technology and aesthetics. The CleanMid® name stands for the very highest quality, so that our mats are suitable for both light and intensive use. Every part of a CleanMid® mat has been developed with user-friendliness and durability in mind. Thanks to its rollability, the mat is easy to maintain and the textile strips are perfectly integrated into the aluminium base for extra stability.

Are there signs of wear after a long period? The inlay strips are easy to replace, guaranteeing an extra long life.

**The smart solution for your home, shop or office.**

### CleanMid® Light

- ▶ for light to intensive use
- ▶ easy to maintain
- ▶ replaceable strips
- ▶ close-fitting
- ▶ rollable
- ▶ smooth overall effect

### CleanMid® Heavy

- ▶ for light to intensive use
- ▶ easy to maintain
- ▶ replaceable strips
- ▶ close-fitting
- ▶ rollable
- ▶ smooth overall effect
- ▶ stable walking surface
- ▶ ideal for wheeled traffic

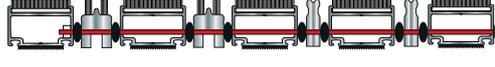

## A firm base

The choice of aluminium for the base was a deliberate one: it can resist the heaviest wear, weight and pressure. The cavities between the strips ensure the perfect evacuation of dirt and damp, while still creating a smooth and stable walking surface, even for high heels.

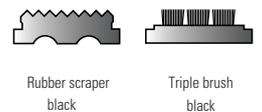

### 4 types

### CleanMid® technical characteristics:

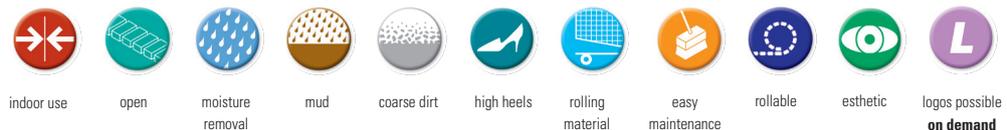

<p><b>Light</b></p>	 <p>CleanMid Light - with pvc</p>	 <p>Single brush/only with CleanMid Light</p>	<p>12/20/25 mm</p> <p>20/25 mm</p>
<p><b>Heavy</b></p>	 <p>CleanMid Heavy - with cable</p>	 <p>Alternating brush and scraper profile / only with CleanMid Heavy</p>	<p>20/25 mm</p> <p>25 mm</p>

### Textile colours

We will continue to expand our range of colours. See [www.verimpex.eu](http://www.verimpex.eu) for future updates.

### Characteristics

[www.verimpex.eu](http://www.verimpex.eu)

## **Belgian craftsmanship**

Technological innovation, top-class craftsmanship and great aesthetic appeal. Verimpex manufactures made-to-measure floor mats, which can be tailored to every preference, function and location. Including personalized colours and logos. Each entrance mat is the result of high quality precision work and a state-of-the-art production process.

## **Guarantee**

Our mats can stand the test of time and traffic. We know this for certain. And we are proud of it. That's why each CleanMid® mat comes with a 5 year guarantee against wear. Including service. Please see the guarantee terms on our website.

## **Testing**

The CleanMid® has been extensively tested in collaboration with the University of Ghent. The positive results of all the tests, which were based on European norms, confirm the outstanding quality of CleanMid®.

**You can find the results of these tests on our website: [www.verimpex.eu](http://www.verimpex.eu)**
