

Information on the country strategy Bolivia

For each partner country of VLIR-UOS, a country strategy has been developed. The country strategy represents the strategic niche for VLIR-UOS cooperation in a country, with specific **thematic areas** and an institutional and/or regional focus, based on the needs and national priorities of the country with regard to higher education and development. The [VLIR-UOS Country Strategy for Bolivia](#) fits very well with the national development strategy and plans focusing on 'vivir bien' and sustainable development, translated in a country strategy with 3 central themes: '**environment and natural resources**', '**food security and sovereignty**' and '**social development**'. '**Research support**' has been identified as crosscutting theme. There is no strict limitation for the **geographical focus**, but the intention is to increase the cooperation with institutes outside the central axis (La Paz – Cochabamba – Santa Cruz) so as to reach the poorest parts of the country as well, which are often neglected by other donors (f.e. Chuquisaca). As for the **institutional focus**, TEAM and JOINT projects can be submitted in cooperation with one of the 12 universities from the national system (Universidad San Francisco Xavier de Chuquisaca, Sucre; Universidad Mayor de San Andrés, La Paz; Universidad Mayor de San Simón, Cochabamba; Universidad Autónoma Gabriel René Moreno, Santa Cruz; Universidad Técnica de Oruro, Oruro; Universidad Autónoma Tomás Frías, Potosí; Universidad Juan Misael Saracho, Tarija; Universidad Autónoma del Beni 'José Ballivián', Trinidad; Universidad Nacional 'Siglo XX', Potosí; Universidad Amazónica de Pando, Cobija; Universidad Pública de El Alto, El Alto; Universidad Católica Boliviana San Pablo (until the end of the IUC Programme only eligible for JOINT)). For South Initiatives, also the 3 indigenous universities are included (UNIBOL – Aymara 'Tupac Katari', Warisata; UNIBOL - Guarani 'Apiaguaiki Tüpa', Machareti; UNIBOL – Quechua 'Casimiro Huanca', Chimoré). A promoter wishing to engage in a cooperation with a higher education institute or public (not for profit) research institute not listed, will need to motivate in the project proposal why a collaboration with this institute is found relevant, how the proposal is aligned with the country strategy and why he/she is presenting a proposal with the proposed partner institution.

Information for potential synergy and complementarity

Synergy and complementarity (S&C) can improve the impact of development cooperation interventions and is a top priority of the Belgian minister of Development Cooperation and encouraged by the reform of non-governmental cooperation in 2016. In order to promote S&C, all Belgian non-governmental development actors were invited to elaborate a Joint Strategic Framework (JSFs) per country in 2016. These JSFs provide information about the goals to which the actors want to contribute, and also indicate potential for synergy and complementarity. In the table below, a general overview of relevant information from the **Joint Strategic Framework** Bolivia is provided for each **thematic area** of the VLIR-UOS **country strategy**. The Joint Strategic **Goal** relevant for each theme is listed, together with the **Belgian non-governmental actors** which are active in **Bolivia** with funding of the Belgian development cooperation. By providing this list, VLIR-UOS wants to facilitate **synergy** and/or complementarity with programmes of other Belgian actors. Synergy and complementarity will also be integrated as an element in the **selection** of interventions, more in particular when discussing the (developmental) relevance of project proposals. The last updated version of the JSF Bolivia can be found [here](#).
